Become certified on the Power Platform and develop key business and technical skills like digital selling and marketing capabilities.

Build on an open and collaborative platform

Become a #MSFTAdvocate and citizen developer. Jumpstart a career in Tech or Advisory!

The Opportunity

Microsoft's Power Platform connects Office 365, Dynamics 365, Azure, and hundreds of other apps—and builds end-to-end business solutions. The business applications industry is going through a major transformation. Our low code platform is at the heart of this business transformation, accelerating innovation and helping companies solve today's most challenging business problems with ease.

Project Power Platform offers a unique learning and work experience, preparing students for an exciting future career. During this program at Microsoft in the Netherlands, students will work together with Account Team Units, collaborate with customers and partners, and develop professional skills to get ahead in a working environment. For students interested in technology, with a focus on sales and business development, customer adoption, or marketing – this program is for you!
