

Endpoint Management

Microsoft Intune & Much More

- Microsoft Intune
- UEM – Single Pane of Glass
- New features – Intune Suite!
- New Windows LAPS
- NDA Roadmap

Licensing: Enterprise Mobility + Security

- **Microsoft Intune:** Solution that combines the functionality of Microsoft Intune and Microsoft Endpoint Configuration Manager
 - **Microsoft Intune** for cloud based unified management
 - **Microsoft Configuration Manager** for On-premises and cloud-based management
- **Azure Active Directory:** Azure AD Join, Auto-enrolment, Modern Authentication, Conditional Access...
- **Windows Autopilot** for simplified device deployment
- **Endpoint Analytics** for data-driven recommendations

Cloud-powered
intelligence

Optimized for the
Microsoft 365
stack

Fully integrated
security and
identity

Endpoint
detection and
remediation

Streamlined
updates

Any device and
any app

Microsoft Intune

+
AOSP**

Android Enterprise (ZTE)
Samsung Knox (KME)
Kiosk mode
Work Profiles
Intune APP managed

A note from JamF integration

JamF has documented the support deprecation for MS PDM API (Partner Device Management), and that recommends to move to MS PCM API (Partner Compliance Management):

https://docs.jamf.com/10.39.0/jamf-pro/release-notes/Deprecations_and_Removals.html

New integration announcement at JNUC2022:

Microsoft Intune

Cloud Attach: Tenant Attach + Co-management

Intune – Cloud Attach

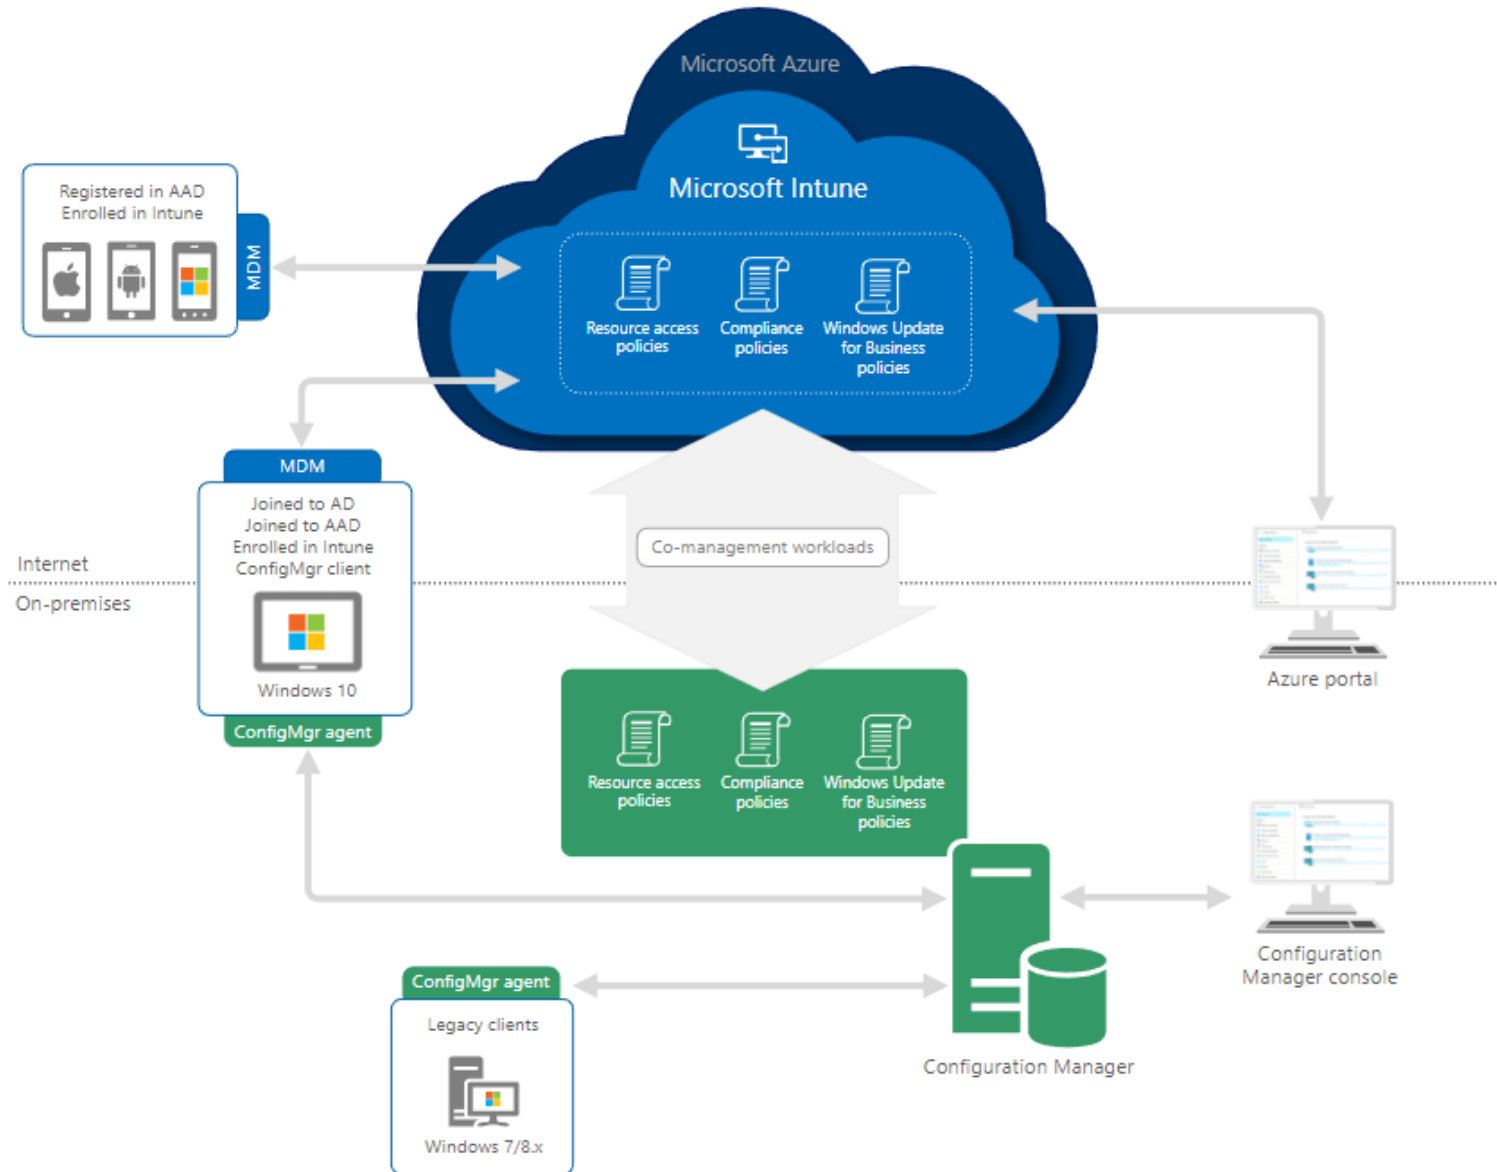

Microsoft Intune

What is cloud attach?

Bring the combined power of Microsoft Endpoint Manager to existing ConfigMgr by attaching to Intune

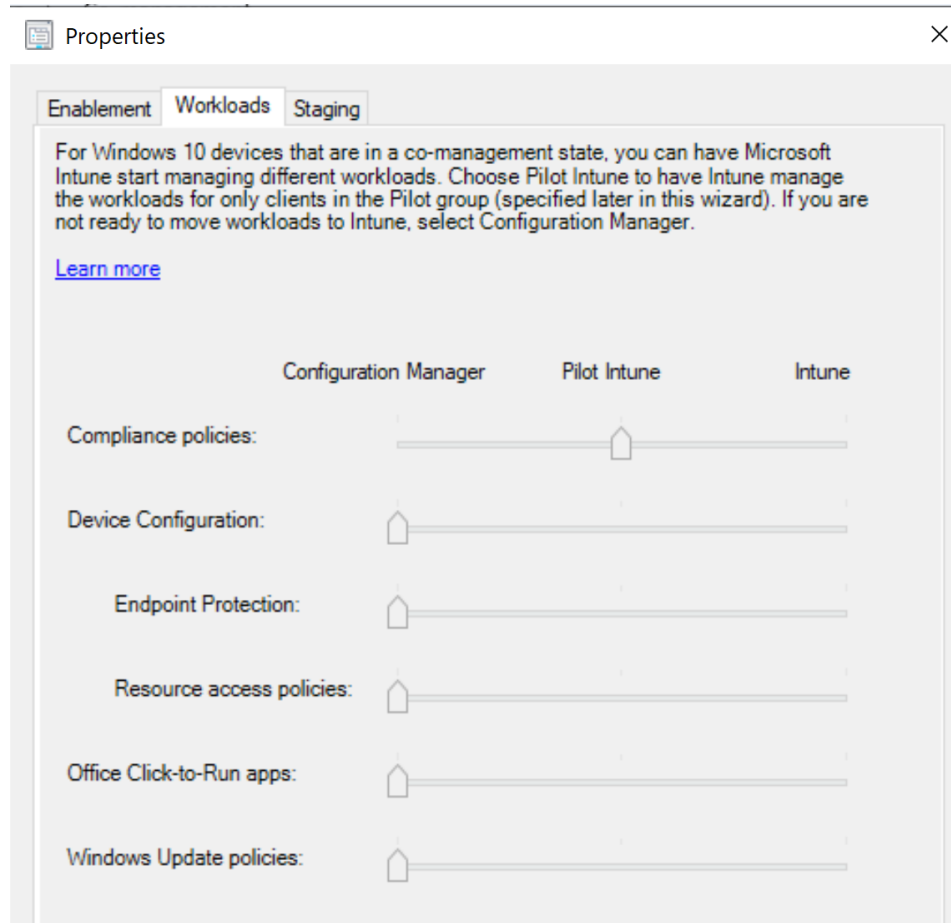

Cloud Attach	
Tenant Attach <small>NEW</small>	Client Attach through co-management
Connect your Configuration Manager site to Intune for instant cloud value	Enroll your Configuration Manager devices into Intune for additional cloud value
Cloud console through Endpoint Manager	
ATP integration	Conditional access
Helpdesk	Modern provisioning through Autopilot
Desktop Analytics	Management anywhere
User Experience Analytics	

Architectural overview

Moving workloads to Intune

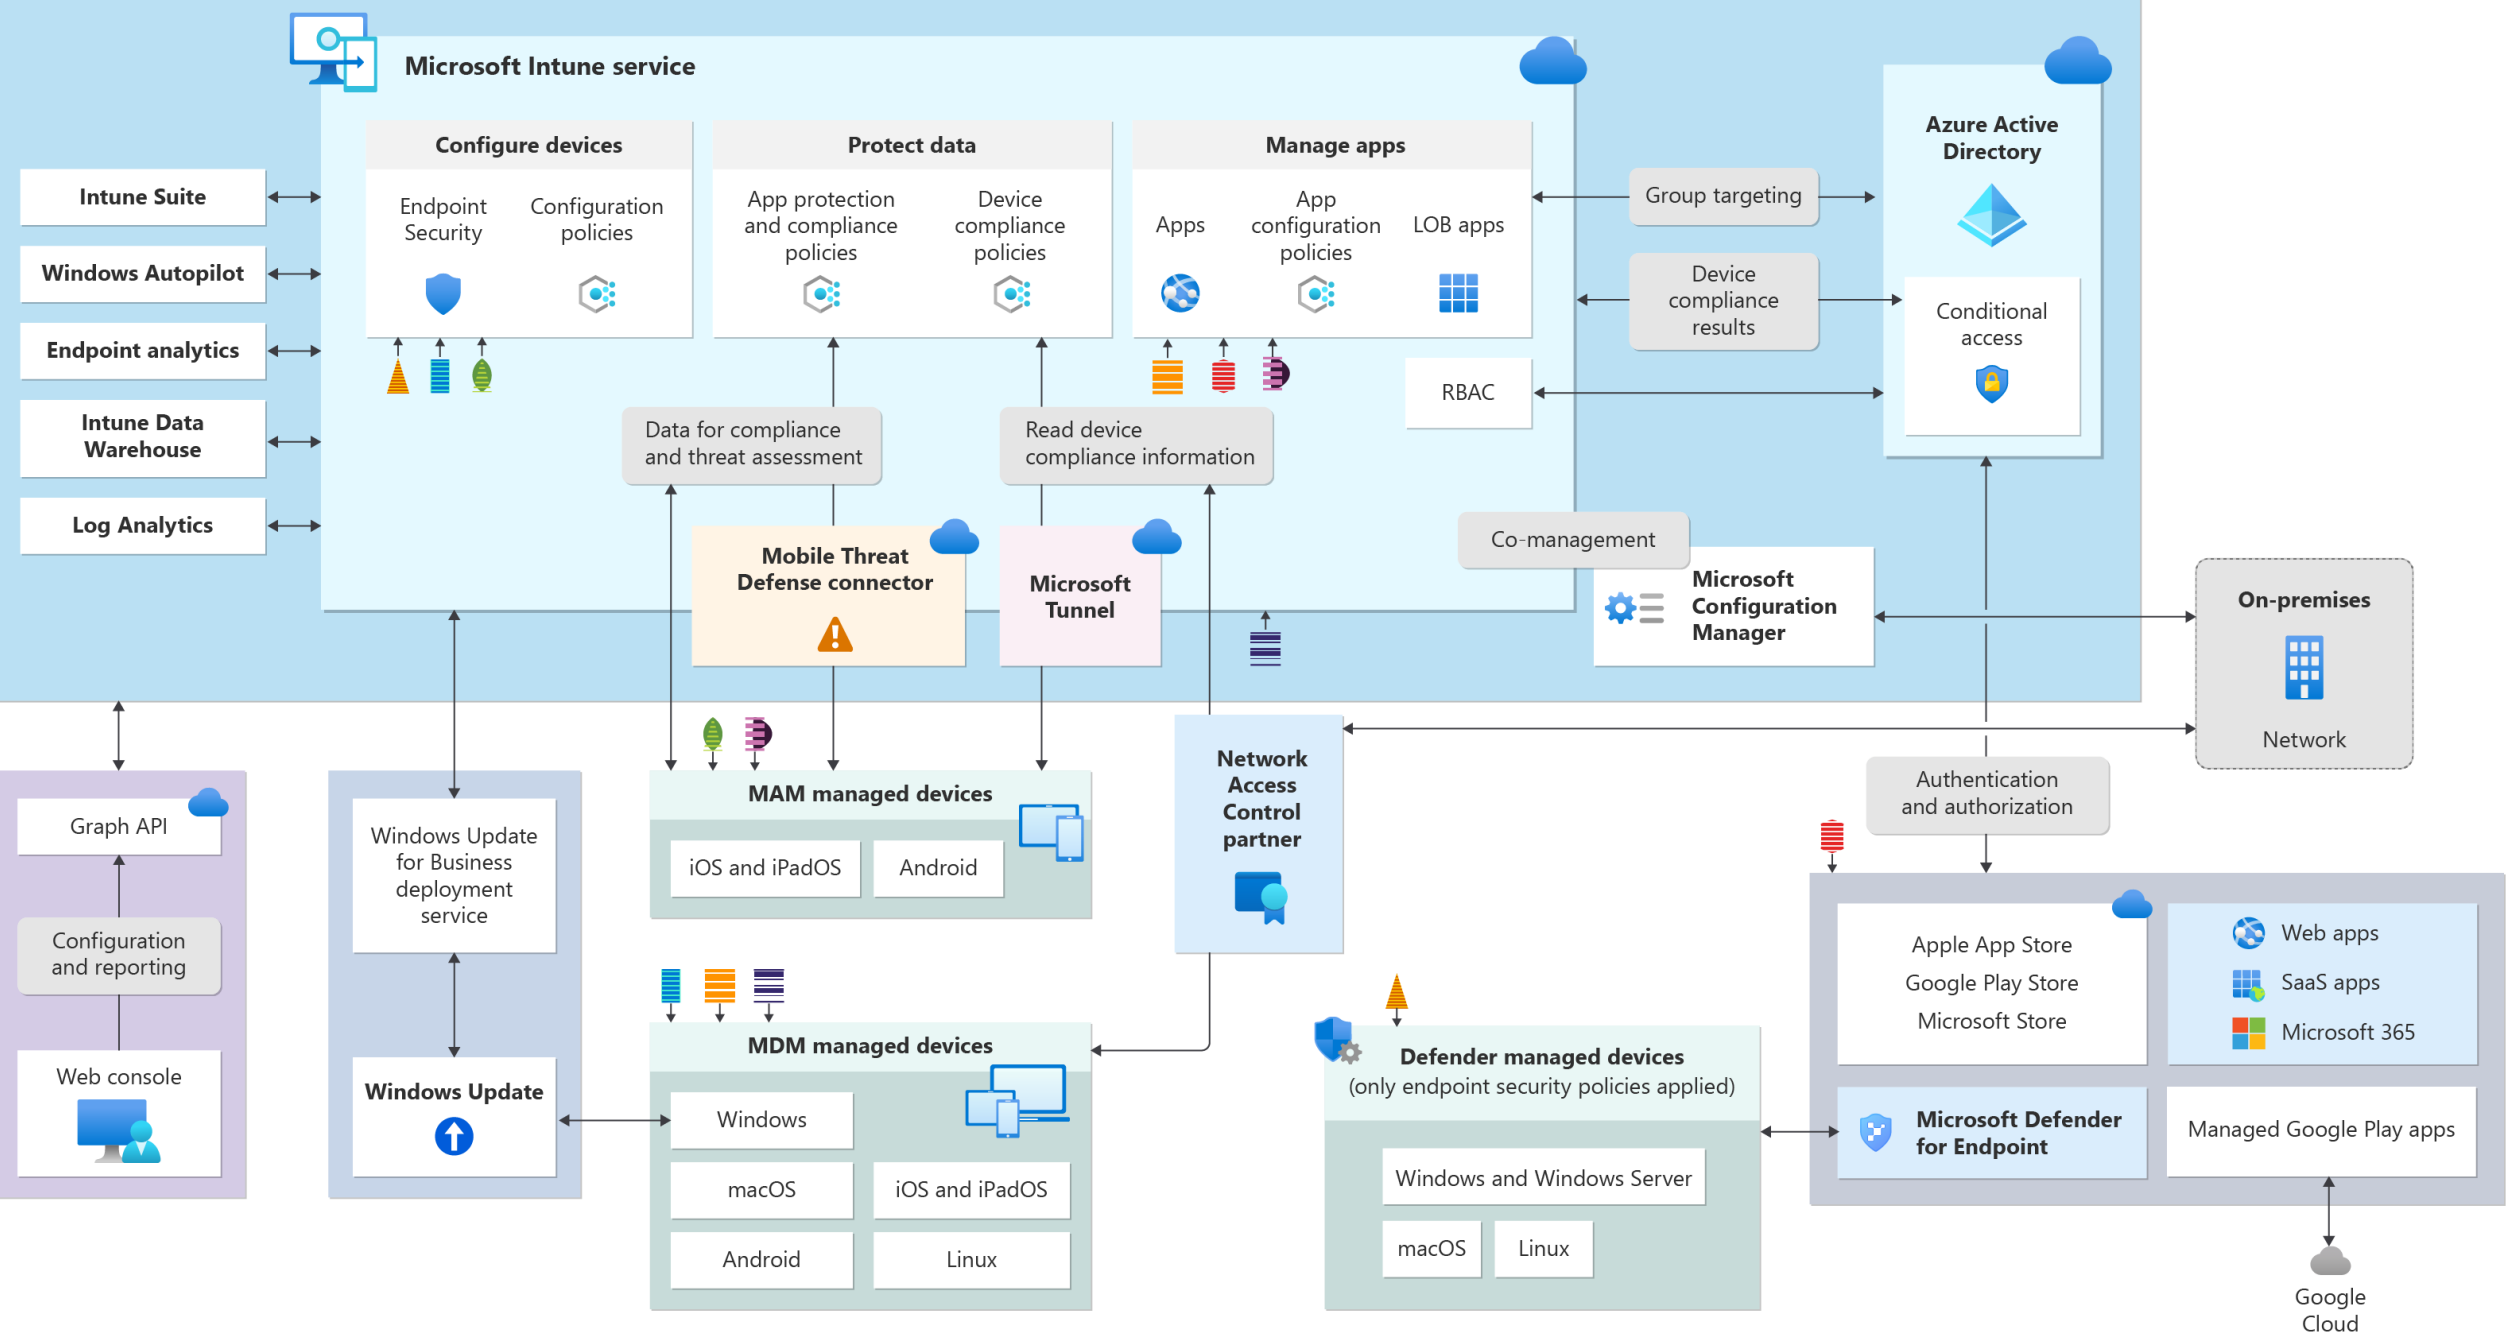

On the Workloads page, choose whether to switch **Configuration Manager** workloads to be managed by **Pilot Intune** or **Intune**

The screenshot shows a 'Properties' dialog box with a 'Workloads' tab selected. The tab contains a text box explaining the co-management state and a 'Learn more' link. Below this, there are six workload categories, each with a slider to distribute management between Configuration Manager, Pilot Intune, and Intune. The sliders are currently set as follows:

Workload Category	Configuration Manager	Pilot Intune	Intune
Compliance policies:	0	100	0
Device Configuration:	100	0	0
Endpoint Protection:	100	0	0
Resource access policies:	100	0	0
Office Click-to-Run apps:	100	0	0
Windows Update policies:	100	0	0

Endpoint Management

Microsoft Endpoint Manager

Q/A

Introducing Microsoft Intune Suite

Strengthen cyber safety and gain
IT efficiency with advanced endpoint
management solutions

March 2023

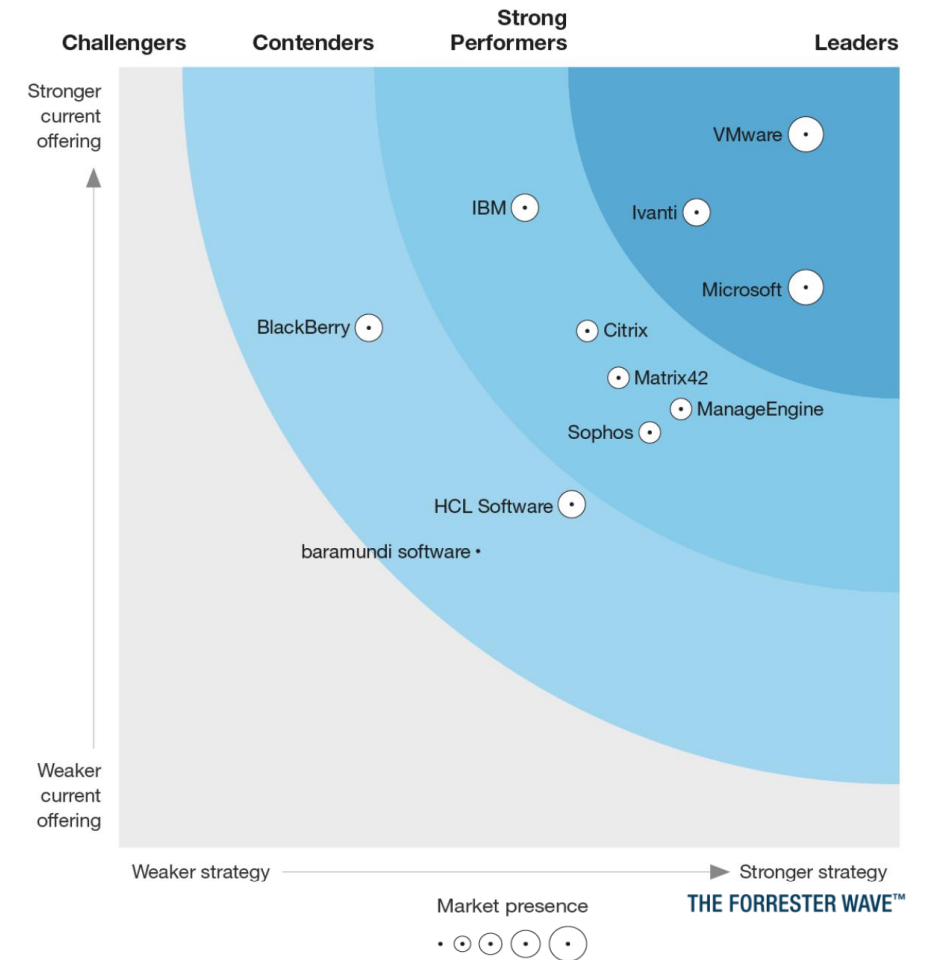

Microsoft is recognized as a leader for UEM tools

2022 Gartner® Magic Quadrant™ for Unified Endpoint Management Tools

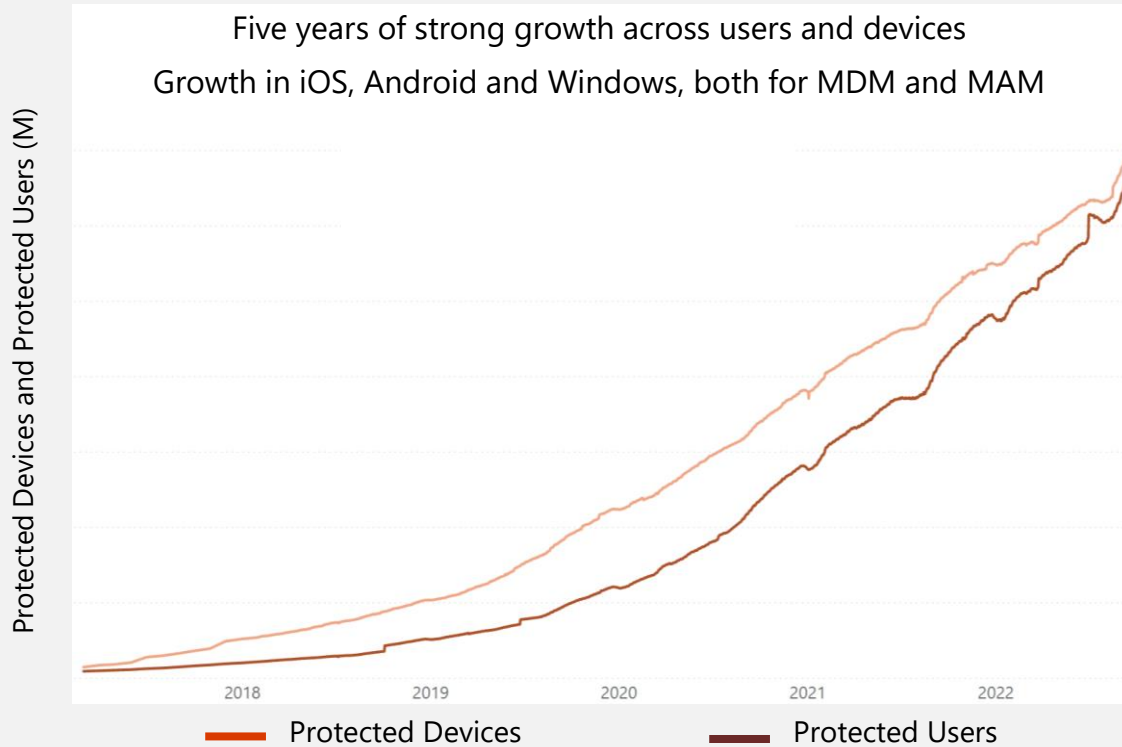

Source: Gartner (August 2022)

2021 Q4 The Forrester Wave for Unified Endpoint Management

Cloud endpoint management momentum

Protected Users and Devices

Protected Users

+68% ↑

Protected Devices

+34% ↑

50% of Windows managed devices are connected to Intune cloud services

Over **80%** of Windows 11 devices are cloud native

40% of Windows connected devices use endpoint analytics for better insights

Hoy: Las organizaciones aun buscan más funcionalidad...

Gestión de vida completo de las aplicaciones

Asistir a los empleados allá donde estén

Acceso a recursos corporativos BYOD

Mejorar los resultados del usuario final a bajo coste IT

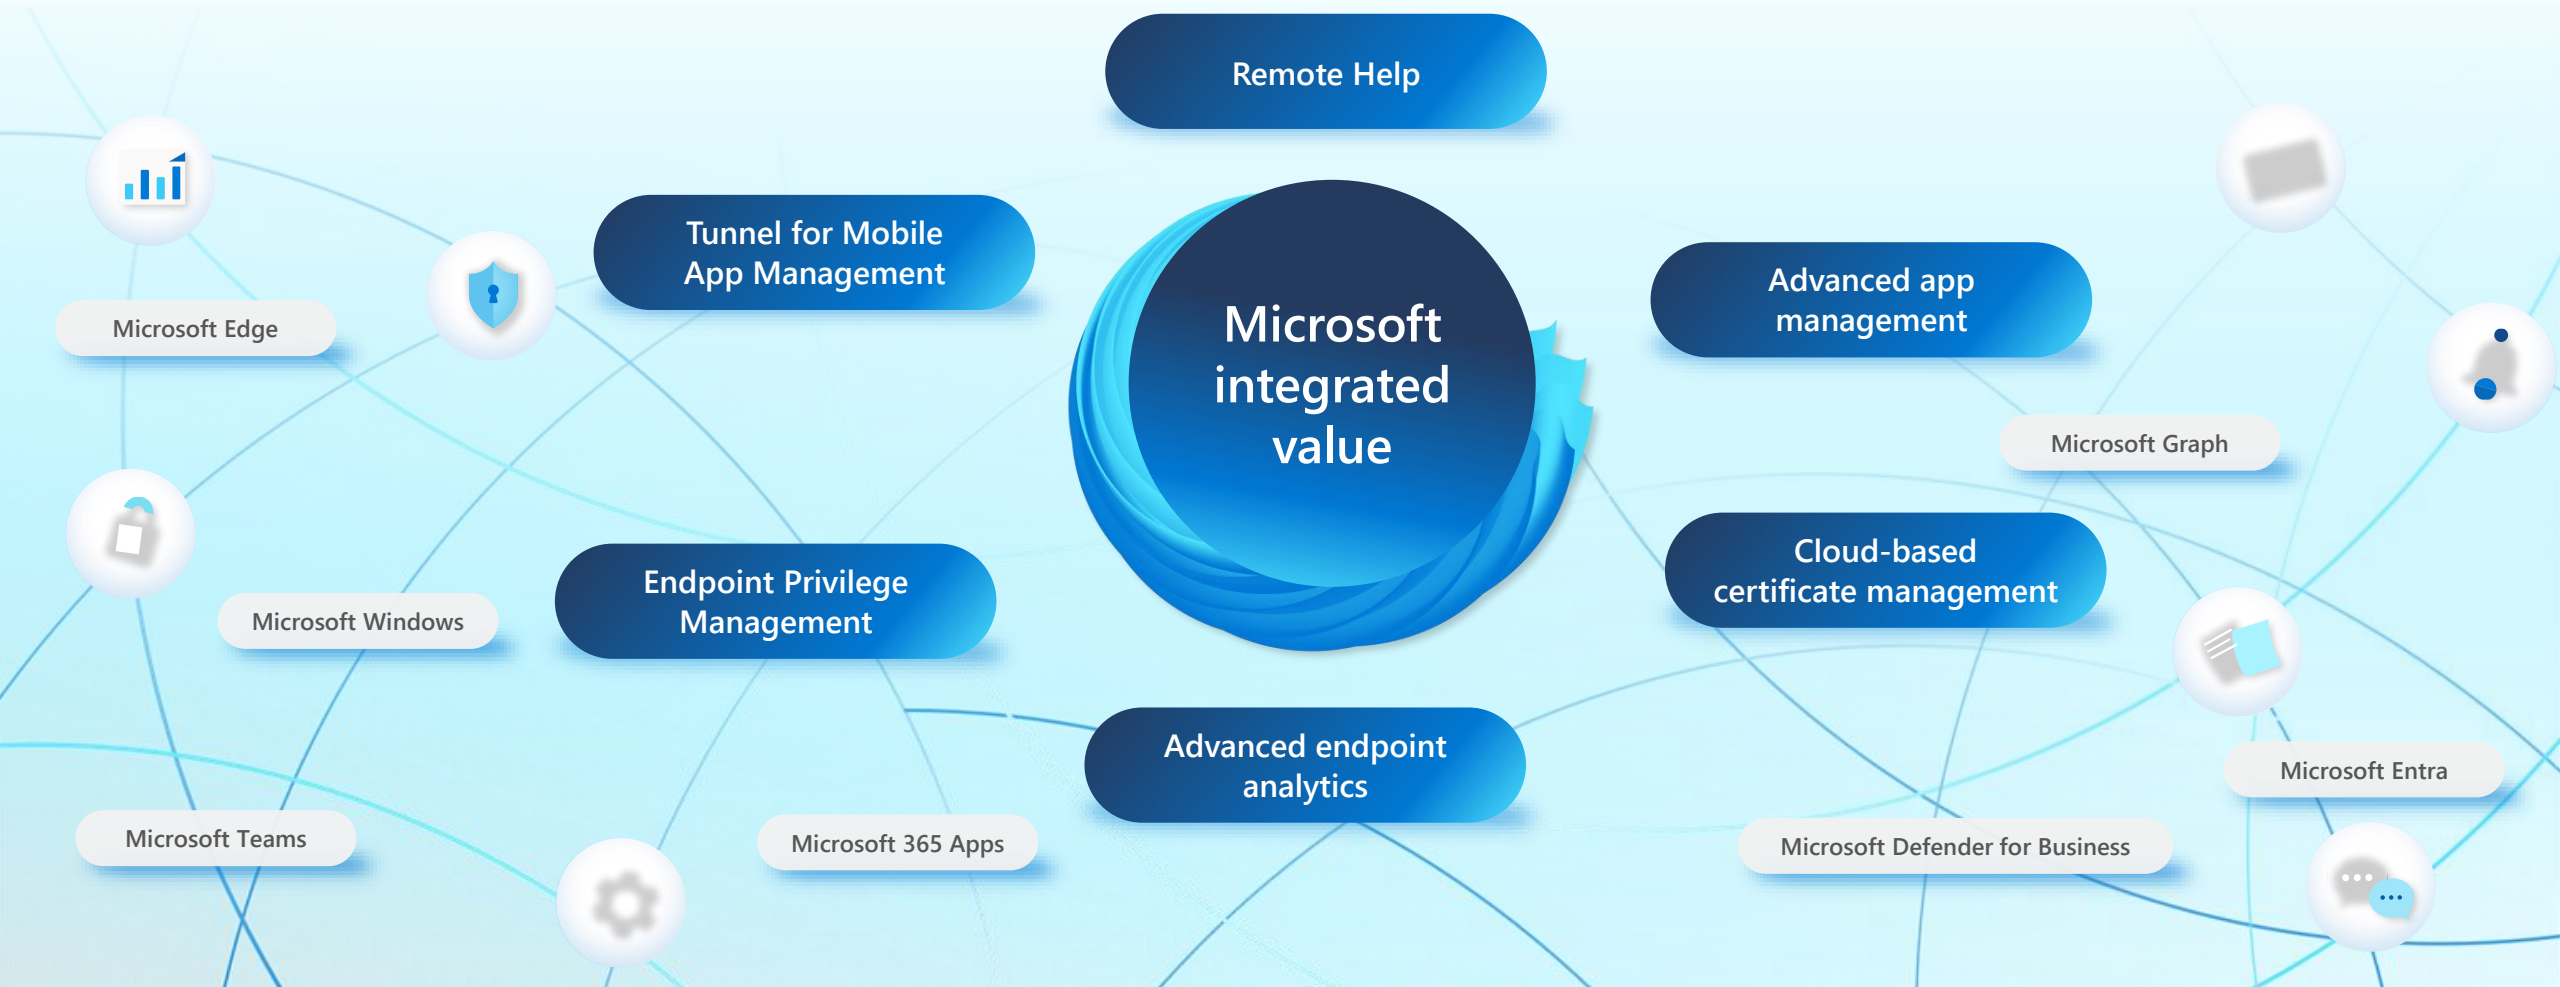

Habilitar least privilege access para usuarios estandar

Gestión de certificados

...y se ven forzados a complementar la gestion del endpoint con soluciones de terceros.

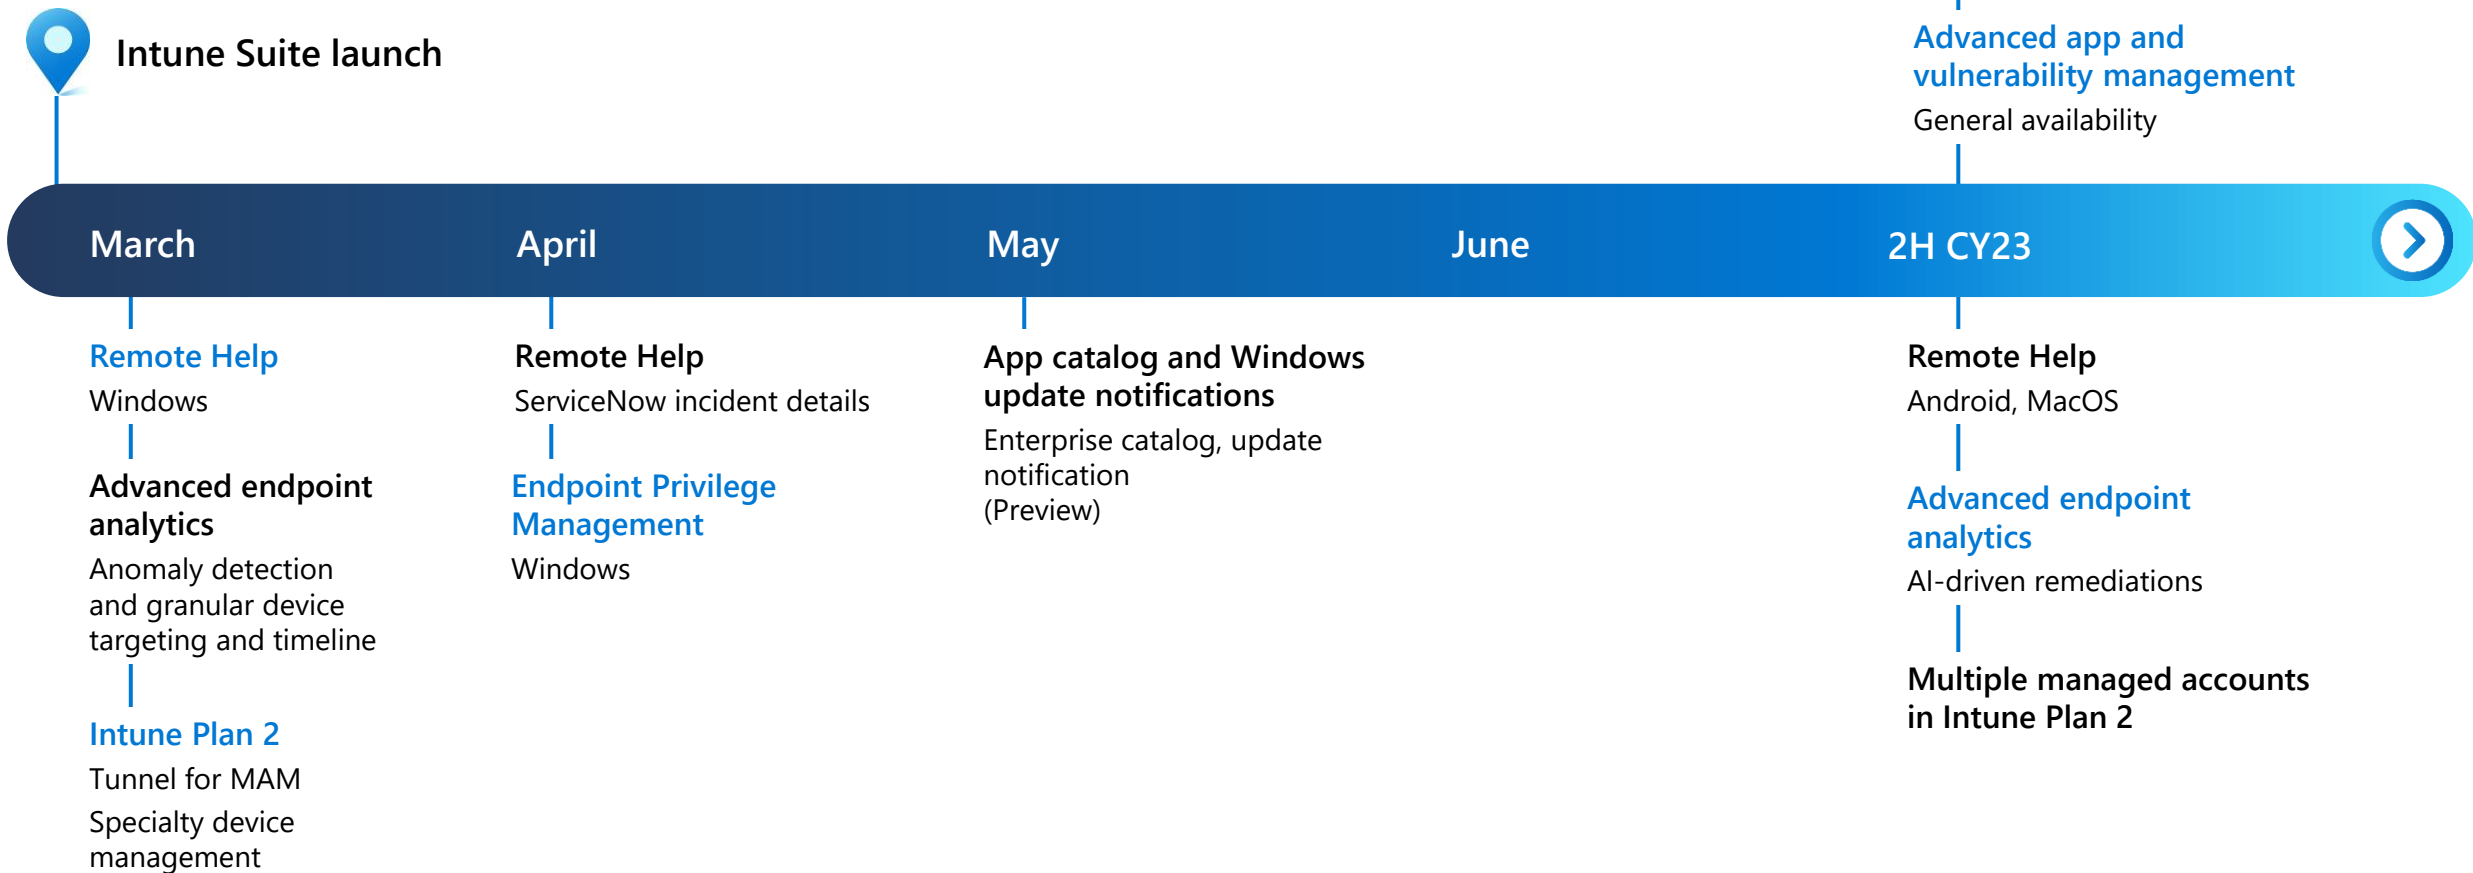

Microsoft Intune Suite

Simplicity | Security | Savings

The approach

Adopt the cost-effective bundled suite
or any combination of individual add-ons
